The Board is committed to robust and non-discriminatory pay processes and is confident that men and women are paid equally for work of equal value. Whilst equal pay exists across the Group there is a gender pay gap principally from fewer women working in technical and operational roles particularly aggregates, minerals, metals, manufacture and processing activities which is not untypical of the areas in which we operate and fewer women in senior leadership positions. I confirm the accuracy of the data and that the Board's full commitment to open processes and improving gender balance where appropriate.
